

Study Programme Name:	<b>MIDWIFERY</b>
Study Programme Code:	<b>B0913P360019</b>
Mode of Study:	<b>Full-time</b>
Standard Length of Study:	<b>3 years</b>
Completed with:	<b>Final state examination</b>
Type of Study:	<b>Bachelor's (Bc.)</b>

## STUDY PROGRAMME

This three-year long bachelor program in Midwifery focuses on obtaining knowledge, skills and professional competences to become a midwife.

## STUDIES

The Physiotherapy programme is a full-time course with a specific and technical character that includes a minimum of 4 600 hours of theoretical and practical lessons, 1 800 hours of which are practical training. Students must obtain 180 credits (ECTS) during their studies.

## GRADUATE PROFILE

A graduate of Midwifery receives complex knowledge from obstetrics, neonatology and gynecology during his/her studies. The curriculum focuses on complex knowledge from pregnancy, physiology, physiology of childbirth, postpartum physiology, care of pregnant women, women in labour, and mothers and their children. At the same time, students become knowledgeable in pathologies during pregnancy, labour and the postpartum period.

## ADMISSION

The rules for admission are determined each year by a direction of the rector of the Medical University.  
The admission to study Midwifery is assessed with a written test on high school level anatomy and psychology.

## TUITION FEES

34 000 CZK / academic year (divided into two payments which are due at the beginning of each semester)
