

Study Programme Name:	PARAMEDIC SCIENCE
Study Programme Code:	B0913P360028
Mode of Study:	Full-time, Part-time
Standard Length of Study:	3 years
Completed with:	Final state examination
Type of Study:	Bachelor's (Bc.)

STUDY PROGRAMME

This three-year bachelor program in Paramedic Science focuses on obtaining knowledge, skills and professional competences which are the necessary foundation for giving emergency care.

STUDIES

The Paramedic Science programme is a full-time or combined course. The standard length of study is three years and includes a direct method of learning, lectures, seminars, training camps, practical training, an indirect method of learning and self-study. Students attend 1 800 hours of practical training and must obtain 180 credits (ECTS) during their studies.

GRADUATE PROFILE

A graduate of Paramedic Science is a medical operative specialised in the field of emergency care in Emergency Medical Services and other types of rescue services related to giving pre-hospital care, specialised first aid, and during inpatient intensive care including emergency care.

ADMISSION

The rules for admission are determined each year by a direction of the rector of the Medical University.

The admission to study Paramedic Science in full-time study is assessed with a written test on high school level anatomy and psychology and a talent exam where swimming skills are assessed.

Applicants interested in the part-time mode of study are assessed with talent exam only.

TUITION FEES

58 000 CZK / academic year (divided into two payments which are due at the beginning of each semester)
